

MC Mobile User Guide (VER 0.2.1)

KWANGEON KIM

Installation

- ▶ Download the APK for the mobile application from [HERE](#).
- ▶ Open the downloaded APK file and start the installation for the app.

Login Screen

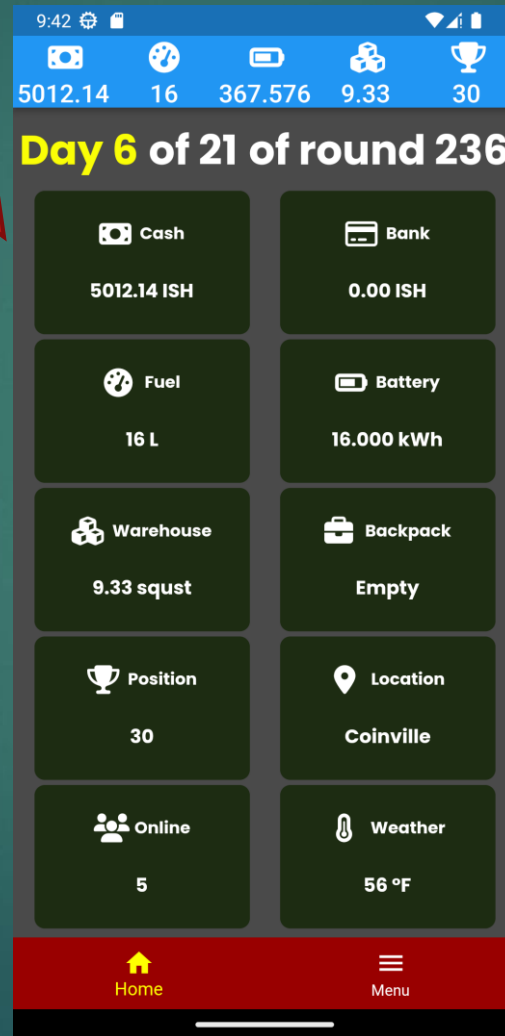

- ▶ This is the first screen that is shown on application launch.
- ▶ Please enter in your Miniconomy credentials and hit the login button to continue.

Home Screen & App Bar

D-2 of round 236

When a round isn't in-session, days until start are displayed. When a round is in-session, round info is displayed.

- ▶ On successful login, the home screen is displayed with the player's information.
- ▶ The data presented here will update automatically if updates are needed.

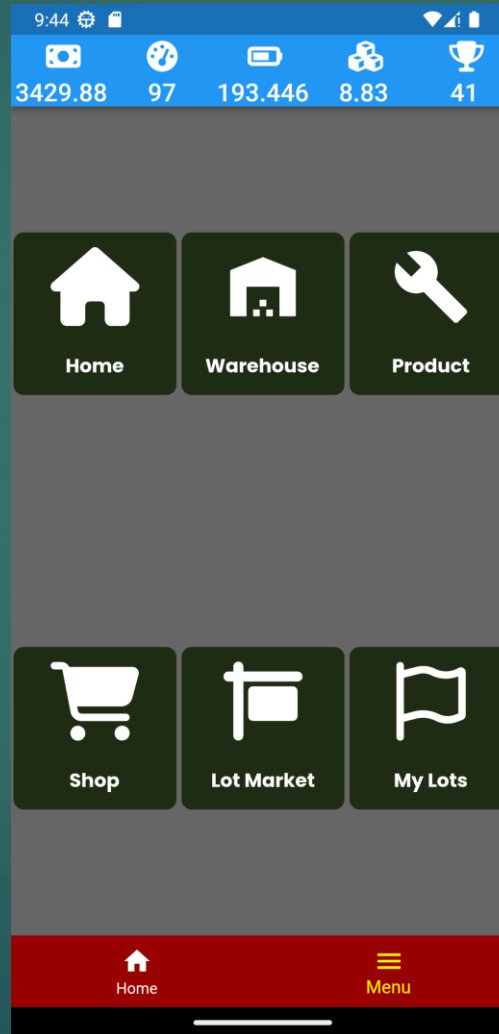

The top application bar keeps track of the following important player information: cash, fuel, energy, warehouse space, and position.

The bottom application bar is a navigation bar. Tapping on the item will display the appropriate screen.

Menu Screen

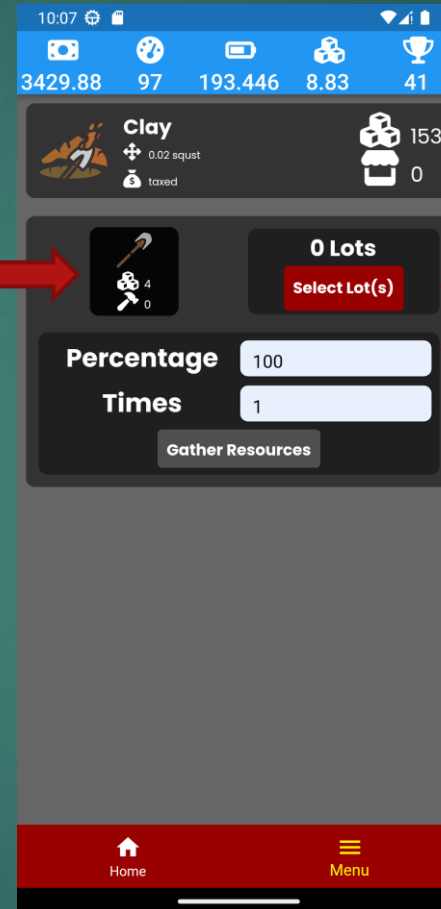

- ▶ Click on desired menu button to navigate to the appropriate screen.
